

Printing a Report to a networked printer

You can easily print a report to a networked printer. This is similar to printing a web page from an internet browser.

Try It Out

1. When you can see a report on your screen, simply **right click**.
2. **Click Print**.

The screenshot shows the Epic View Only - Clinical (17-0081) interface. The main window displays a 'Chart Review' table with columns for 'Res', 'Images', 'Crit Result', 'Ordered', 'Performed', and 'Exam'. The table lists several imaging studies, including X-ray abdomen 3 view, CT abdomen and pelvis, CT chest with contrast, IR angio carotid cereb, CT abdomen and pelvis, IR angio carotid cereb, IR vena cava filter pla, IR inferior venacavag, IR inferior venacavag, CT abdomen and pelvis, CT abdomen and pelvis, CT abdomen and pelvis, CT head with contrast, CT abdomen and pelvis, CT abdomen and pelvis, and CT abdomen and pelvis.

On the right side of the interface, there is a patient information section for Scripps Green Hospital Breast Care, including patient details like MRN, DOB, SSN, and sex. Below this, there is an 'Allergies' section listing 'Bee Pollen' and an 'Order Date' of Jan 30, 2016. A right-click context menu is open over the 'Print' option, with the 'Print' option highlighted. The menu includes options like Back, Refresh, Find, Print, Copy All, Launch PasteBoard, and Configure the Order of This Report.

A blue callout box at the bottom of the screenshot contains the following text:

Right click any report to print it to a networked printer.
This is similar to printing a web page from an Internet browser.

At the bottom right of the interface, there are navigation buttons labeled '< PREV' and 'NEXT >'.
